Contents **Volume 182**

R. A. Bailey (London, United Kingdom) and
C. A. Rowley (Milton Keynes, United Kingdom)
Maximal Rank of an Element of a Tensor Product 1

I. Gohberg (Ramat Aviv, Israel), M. A. Kaashoek,
and F. van Schagen (Amsterdam, the Netherlands)
On the Local Theory of Regular Analytic Matrix Functions 9

Fernando C. Silva (Lisboa, Portugal)
Matrices With Prescribed Lower Triangular Part 27

Bernd Silbermann (Chemnitz, Germany)
On the Limiting Set of Singular Values of Toeplitz Matrices 35

Dragoš Cvetković (Belgrade, Federal Republic of Yugoslavia),
Peter Rowlinson (Stirling, Scotland, United Kingdom),
and Slobodan Simić (Belgrade, Federal Republic of Yugoslavia)
A Study of Eigenspaces of Graphs 45

J. G. Braker and G. J. Olsder (Delft, the Netherlands)
The Power Algorithm in Max Algebra 67

R. Mathias (Minneapolis, Minnesota) and
G. W. Stewart (College Park, Maryland)
A Block QR Algorithm and the Singular Value Decomposition 91

R. B. Bapat (New Delhi, India)
Symmetric Function Means and Permanents 101

Alexander Sakhnovich (Odessa, Russia)
Exact Solutions of Nonlinear Equations and the
Method of Operator Identities 109

L. Grunenfelder (Halifax, Nova Scotia, Canada) and
M. Omladič (Ljubljana, Slovenia)
Linearly Recursive Sequences and Operator Polynomials 127

S. K. Jain and L. E. Snyder (Athens, Ohio)
Nonnegative Normal Matrices 147

Apostolos Hadjidimos and Dimitrios Noutsos (West Lafayette, Indiana)
On a Matrix Identity Connecting Iteration Operators
Associated With a p-Cyclic Matrix 157

Harald K. Wimmer (Würzburg, Germany)
Pairs of Companion Matrices and Their Simultaneous
Reduction to Complementary Triangular Forms 179

Table of Contents continued

REN-CANG LI (Beijing, People's Republic of China)
Norms of Certain Matrices With Applications to
Variations of the Spectra of Matrices and Matrix Pencils 199

L. ELSNER (Bielefeld, Germany)
A Note on the Hoffman-Wielandt Theorem 235

MATJAŽ OMLADIČ AND PETER ŠEMRL (Ljubljana, Slovenia)
Additive Mappings Preserving Operators of Rank One 239

M. EIERMANN AND R. S. VARGA (Kent, Ohio)
Is the Optimal ω Best for the SOR Iteration Method? 257

AUTHOR INDEX 279
